## CHILD'S EDUCATION

School choice has been the least talked about topic in the American society. School choice improves education by letting parents choose the right school for their children that improves their academics. Unlike healthcare that is a service school choice is a right that benefits the student and their future. Parents & students should pick which public school that suits them best. School choice school results in higher graduation rates, higher grades, and even lower crime rates. Public schools themselves actually improves because it pushes and motivates them to do better
